DETAILED ACTION

SET I

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1. Claims 1-5 rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihara (US 6,643,291) in view of Haga (US 20030231338).

As to claim 1, Yoshihara teaches an apparatus (figures 1, 24-28 and their descriptions), comprising:

a gateway component that provides an identifier of a service provider to a sender of a message through employment of a user address associated with a recipient of the message.

Yoshihara fails to teach the identified is a logo associated with the service provider. Haga teaches the identified is a logo associated with the service provider (paragraph 588). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the teaching of Haga into the system of Yoshihara in order to identify the domain server.

As to claim 2, Yoshihara teaches the apparatus of claim 1, wherein the service provider is associated with the recipient of the message, wherein the gateway component determines the identifier

Art Unit: 2617

of the service provider associated with the recipient of the message through employment of the user address associated with the recipient (figures 1, 24-28 and their descriptions).

As to claim 3, Yoshihara teaches the apparatus of claim 2, wherein the gateway component determines an indication of a text-delivery network associated with the service provider, wherein the gateway component provides the indication of the text-delivery network to the sender (figures 49, 50 and their descriptions).

2. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihara and Haga in view of Lasenski (US 20050058260).

As to claim 4, Yoshihara and Haga teaches the apparatus of claim 3, Yoshihara and Haga fails to teach the indication of the text-delivery network comprises a Universal Resource Locator (URL) associated with the text-delivery network, wherein the gateway component provides the Universal Resource Locator to the sender to allow for an initiation of the message by the sender. Lasenski teaches a Universal Resource Locator (URL) associated with the text-delivery network, wherein the gateway component provides the Universal Resource Locator to the sender to allow for an initiation of the message by the sender (paragraph 0082). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the teaching of Lasenski into the system of Yoshihara and Haga in order to identifies the location in server system of the message to be accessed.

SET II

Claim Rejections - 35 USC § 103

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Lasenski (US 20050058260) in view of Haga (US 20030231338).

As to claim 1, Lasenski teaches an apparatus (figures 8-10 and their descriptions), comprising:

a gateway component that provides an identifier of a service provider to a sender of a message through employment of a user address associated with a recipient of the message.

Lasenski fails to teach the identified is a logo associated with the service provider. Haga teaches the identified is a logo associated with the service provider (paragraph 588). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the teaching of Haga into the system of Yoshihara in order to identify the domain server.

As to claim 2, Lasenski teaches the apparatus of claim 1, wherein the service provider is associated with the recipient of the message, wherein the gateway component determines the identifier of the service provider associated with the recipient of the message through employment of the user address associated with the recipient (figures 8-10 and their descriptions).

As to claim 3, Lasenski teaches the apparatus of claim 2, wherein the gateway component determines an indication of a text-delivery network associated with the

service provider, wherein the gateway component provides the indication of the textdelivery network to the sender (figures 11, 15 and their descriptions).

As to claim 4, Lasenski teaches the apparatus of claim 3, wherein the indication of the text-delivery network comprises a Universal Resource Locator (URL) associated with the text-delivery network, wherein the gateway component provides the Universal Resource Locator to the sender to allow for an initiation of the message by the sender (paragraph 0082).

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 5, 25 are allowed as stated in the Applicant 's on pages 9-11.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

A. Chung (US 2004/0117451) teaches method and systems for electronic mail internet target and direct marketing and electronic mail banner.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/719,869

Art Unit: 2617

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
